Chapter -2 Water and Weather

I. Answer these questions:

1. Which are the three forms of water?

Ans. Ice, water and water vapour are the three forms of water.

2. How do floods affect our life?

Ans. Floods damage crops, buildings and roads. This is how they affect us.

3. Does weather affect what we eat? Give an example.

Ans. Yes, weather affects what we eat. For example, in place where it rains a lot, people grow and eat rice crop needs a lot of water.

4. What is breeze?

Ans. When the wind blows gently , it is called breeze.

5. What happens to water when it is boiled?

Ans. Water changes to water vapour or steam when it is boiled.

6. What happens to the water when it is cooled?

Ans. Water changes into ice when it is cooled.

7. Name three things that affect the weather at a particular time.

Ans. The sun, the wind and the rain affect the weather at a particular time.

II. Think and answer:

1. Why is noon the hottest part of the day ?

Ans. At noon, the sun is overhead and the rays fall straight. That is why noon is the hottest part of the day.

2. Why is a cloudy night warmer than a night when the sky is clear?

Ans. A cloudy night is warmer than a night when the sky is clear because clouds do not allow the heat of the earth to escape into the atmosphere.

III. Draw and label:

Water cycle
